

Windows 10 Virtualbox Issue after Installing Docker

Some participants are facing issues in using VirtualBox after installing Docker desktop in their Windows 10 machines. Please follow the steps below to resolve it,

1. Uninstall Docker Desktop
2. Open the "old" Windows Control Panel -> Programs and Features
3. On the left side choose "Turn Windows features on or off":

- 4.
5. Deselect "Hyper-V" in the list of features:

6. Click "OK", let Windows deinstall Hyper-V and reboot at end
7. After reboot you have to **reinstall** your installation of VirtualBox with the original installer!
8. Reboot again
